Summary of Qualifications

Full Stack Developer and Systems Analyst with experience in automation, data science, and developing technological solutions for optimizing business processes. Proven expertise in systems integration, task automation, and data migration, along with experience in statistical analysis and Machine Learning.

Work Experience

Freelancer

REMOTE

Programming and Development

Jul/2023 – Present

- Provide programming and development services for various projects, working as a freelancer and collaborating with clients across multiple industries.
- Develop customized solutions for process automation, systems integration, and workflow optimization, helping businesses improve operational efficiency
- Offer technical consulting for system implementation, API development, and database management, ensuring scalability and security.
- Have experience working with global clients, continually improving my communication skills and adaptability in diverse business environments.

Mount Olympus

EUA

Hospitality

Dec/2022 – Mar/2023

- Worked in the United States with the goal of improving my English skills, immersed in the hospitality industry.
- Collaborated directly with the team to ensure visitor satisfaction, contributing to a high-quality guest experience.
- Gained practical experience in a bilingual work environment, enhancing my technical vocabulary and English fluency.

Martins

BRAZIL

Systems Development Analyst - Mid-Level

Aug/2022 – Dec/2022

- **Reduced data processing time by 50%** through the development of automated routines using SAS.
- Migrated legacy data systems to SAS, ensuring higher data efficiency and security.
- Developed and maintained reports and dashboards for financial and operational data analysis in SAS.
- Collaborated with the software development team to create integrated solutions and provided 24/7 support for the BI operations group.

Souza e Cia LTDA

BRAZIL

Systems Development Analyst

Apr/2022 – Aug/2022

- Responsible for creating and maintaining servers and resolving system and database issues.
- Developed customer registration systems using PHP and MySQL
- Provided technical support for 60 remote users, resolving technology-related issues and improving security and network performance.
- Implemented an electronic invoice system and trained users, increasing efficiency in business operations.

Consultant

REMOTE

Python and C Developer

Feb/2018 – Jan/2022

- Developed automation scripts and facial recognition systems using Python and OpenCV.
- Trained chatbots and AI systems for home automation and monitoring.
- **Improved online game performance by 40%** with custom scripts.
- Developed scripts for task automation in web applications, reducing manual workload by automating repetitive tasks.
- Provided 24/7 technical support for automation systems, ensuring continuous functionality and quick resolution of issues.

Technical Skills

Strongest Areas

Data Structures, Algorithms, Process Automation

Programming Languages

C/C++, JavaScript, Python, PHP, C#

Libraries/Frameworks

React.js, Express.js, Next.js, Typescript, Webpack, Node.js, HTML5, CSS3, Flask, Git

Database

PostgreSQL, MySQL, SQLite, SQL Server

Platforms

AWS, Vercel, Linux, Windows Server

Analytics Tools:

NumPy, Pandas, Matplotlib, Tableau, Power BI, SAS

Education

Bachelor's Degree in Information Systems

BRAZIL
